

NAVEEN KUMAR

IT Infrastructure, Cloud and System Engineer

Mob.: +91-9412117767

Email: naveen.rajpoot@outlook.com

[LinkedIn](#) Pune, MH

PROFESSIONAL SUMMARY

Infrastructure, Cloud and Systems Engineer with 8+ years of experience managing complex enterprise datacenters, cloud environments, and hybrid systems. Proven track record in Linux, Windows, AWS and Azure cloud platforms, and DevOps automation tools (Terraform, Ansible, Docker and GitHub Action). Focused on improving uptime, reducing provisioning time, and creating scalable infrastructure patterns through Infrastructure as Code.

TECHNICAL SNAPSHOT

LINUX

- Linux/Unix server installation, configuration, and troubleshooting & OS Patching.
- Automation and Performances monitoring and tuning.
- Administration: Process/Swap Memory/Memory/File System/NFS/Disk/NTP/Crony/Software...etc.
- File system management using Logical Volume Manager (LVM command: pvcreate, pvdisplay, vgcreate, vgextend, vgdisplay, vgscan, lvcreate, lvextend, lvdisplay).
- Linux Server Backup and Restore & Network Fundamentals.
- User and group management, File permission, special permission, and ownership management.
- Configuration Management using Ansible Modules or YAML playbooks.
- Yum Configuration & installing various packages and Kernel Upgrading.
- Collecting various log SOS Report, AHS Log and Syslog configuration and management.
- User and group management and BASH scripting.
- Network interface and IP configuration and Making DNS Entry.
- Management File Systems.

CLOUD

- Provisioned and managed Azure VMs, VMSS, and AWS EC2/Auto Scaling Groups with HA across AZs.
- Implemented VNet/VPC peering, NSG/Security Groups, VPN Gateway, Private Endpoints, and Application Load Balancer.
- Secured environments with Entra ID / IAM roles, RBAC, Policies, KMS encryption, and Secrets Manager.
- Automated infra with Terraform/ARM, reducing manual deployment time 60%.
- Configured monitoring/alerting with Azure Monitor/Log Analytics and CloudWatch/CloudTrail/Config.
- Implemented Backup & DR with Azure Backup/Site Recovery and AWS Backup, Route 53 failover
- Bash, PowerShell, Ansible, or Terraform for automating routine deployment tasks.
- Build and maintain CI/CD pipelines to streamline application testing, release engineering, and continuous deployment through GitHub Actions and Runners.
- Shift legacy on-premises applications and workloads into cloud environments with minimal operational downtime.
- Enforce Identity and Access Management (IAM) controls based on the principle of least privilege.
- Implement network security rules, encryption at rest and in transit, and regulatory compliance guardrails.
- Monitor system health, log metrics, set up alerts, and troubleshoot production incidents.
- Analyze resource utilization, decommission idle workloads, and optimize instances to keep cloud spending predictable.

VMWARE VSPHERE (6.5/6.7/7.0)

- Installing, Configuring, updating, and troubleshooting of ESXi server & VMware vCentre Server Appliance.
- Update ESXI Host Build Version, Virtual Machines Hardware Version and required Patches with vCenter Update Manager.
- VM Compute & Storage resources monitoring & management using vCenter Server.

WINDOWS SERVER

- Windows server installation, configuration, and troubleshooting.
- Installing, Configuring, and maintaining Active directory.
- MECM: Configuration, Deployments, Patching, OS Upgrade and hardening.
- Windows Server Backup and Restore.
- Deploy Group Policy as per Organization requirement.

HARDWARE

- Installing, Configuring, Upgrading of HPE Servers & HPE SAN Storage.
- Physical Installation, Diagnostic and Server Setup Activities namely Server ILO in HP Server, RAID Configuration.
- Hands-on HPE C-7000 Frame, Synergy 12000 Frame, DL380 Gen9, DL480 Gen9 & DL660 Gen10 servers.

TECHNICAL SKILLS

- Linux (Red hat7/8/9 and SUSE15sp5/6/7) Server Administration
- Cloud:
 - » Access Management (Entra ID, IAM & RBAC)
 - » Virtual Networking (VNet/VPC, NSG, VPN, Load Balancers)
 - » Compute (VMs/EC2, Scale Sets/ASG, Containers, App Service)
 - » Storage (Blob/S3, Files), IaC (ARM/Bicep, CloudFormation)
 - » Operations (CloudWatch/Azure Monitor, Backup/DR, Cost Optimization).
 - » Proficient in Azure CLI, PowerShell, and AWS CLI
- Windows Server Administration (2012, 2016, 2019, 2022, 2025)
- Container and Orchestration: Docker, Podman, Kubernetes,
- IAC and Configuration Management: Terraform, Ansible
- CD/CI: GitHub & GitHub Actions

WORK EXPERIENCE

CENCORA BUSINESS SERVICES INDIA PRIVATE LIMITED

7th April 2025 – Present, Pune

Role: Engineer II - IT Cloud and Infrastructure (Hybrid Datacenter Technical Operations)

- Design, deploy, configure, and maintain hybrid infrastructure (Azure & AWS).
- Provision and manage compute, storage, networking, and identity services (Terraform).
- Automate infrastructure provisioning and operational tasks using Ansible, Bash and PowerShell.
- Manage cloud security, IAM, Key Vaults, secrets, certificates, and compliance controls.
- Monitor cloud environments, investigate alerts, and resolve incidents.
- Perform root cause analysis (RCA) for complex production issues.
- Support container and orchestration platforms (Docker, Podman, Kubernetes).
- Perform OS administration for Linux and Windows cloud and on-premise workloads.
- Execute cloud migrations and modernization projects.
- Create and maintain technical documentation, SOPs, HLDs, and LLDs.
- Collaboration with application, security, network, and vulnerability teams for security remediation and patching activities.

ZENSAR TECHNOLOGIES LIMITED

14th March 2024 – 4th April 2025, Pune

Role: Technical Specialist (Hybrid Datacenter Technical Operations)

- Design, deploy, configure, and maintain hybrid infrastructure (Azure & AWS).
- Provision and manage compute, storage, networking, and identity services (Terraform).
- Automate infrastructure provisioning and operational tasks using Ansible, Bash and PowerShell.
- Monitor cloud environments, investigate alerts, and resolve incidents.
- Perform root cause analysis (RCA) for complex production issues.
- Support container and orchestration platforms (Docker, Podman, Kubernetes).
- Perform OS administration for Linux and Windows cloud and on-premise workloads.
- Collaboration with application, security, network, and vulnerability teams for security remediation and patching activities.

INSPIRA ENTERPRISE INDIA LIMITED

1st September 2021 – 13th March 2024, Lucknow

Role: Sr. Server Engineer (Hybrid Datacenter Technical Operations)

- Install, configure, and maintain physical (bare-metal) and virtual servers (Windows Server, Linux/Unix distributions, VMware, Hyper-V).
- Work closely with data center technicians to assemble, rack, cable, and configure compute nodes, switches, and storage units.
- Identify bottlenecks, storage limitations, or impending component failures (HDDs, power supplies, memory modules) before service interruption occurs.
- Configure, automate, and manage enterprise backup policies across SAN/NAS storage arrays and off-site cloud storage.

- POC and execute recovery plans to guarantee low Recovery Time Objectives (RTO) and Recovery Point Objectives (RPO) during system outages.
- Schedule and apply regular OS security patches, kernel updates, hypervisor updates, and hardware firmware revisions.
- Manage Directory Services (Active Directory, LDAP) and user access management.
- Diagnose and resolve complex server errors, OS crashes, network connection issues, and storage drops.
- Maintain accurate inventory databases for all server nodes, serial numbers, IP allocations, and network switch ports.

PROIND BUSINESS SOLUTIONS PRIVATE LIMITED

7th July 2021 – 26th August 2021, Noida

Role: System Administrator

- Roles have not been assigned (on bench).

MAHINDRA DEFENCE SYSTEMS LIMITED

1st October 2019 – 6th July 2021, Aimer

Role: Analyst - Server Administrator (Datacenter Technical Operations)

- Install, configure, and maintain physical (bare-metal) and virtual servers (Windows Server, Linux/Unix distributions, VMware, Hyper-V).
- Work closely with data center technicians to assemble, rack, cable, and configure compute nodes, switches, and storage units.
- Identify bottlenecks, storage limitations, or impending component failures (HDDs, power supplies, memory modules) before service interruption occurs.
- Configure, automate, and manage enterprise backup policies across SAN/NAS storage arrays and off-site cloud storage.

REALTYACRES REAL ESTATE PRIVATE LIMITED

16th July 2018 – 27th September 2019, Noida

Role: System Administrator (Hybrid Datacenter Technical Operations)

- AWS Cloud and On-Premise Datacenter Technical Operations (Linux, VMware, Windows, AWS, GCP and Backup) & Corporate IT Support.

IMS GHAZIABAD

4th September 2017 – 14th July 2018, Ghaziabad

Role: System Executive (Datacenter and Compute Lab Technical Operations)

- Server and Workstation Support (Linux, Windows, and Hardware).

ITCONS E-SOLUTIONS PRIVATE LIMITED

30th June 2016 – 30th June 2017, Noida

Role: Desktop Support Engineer

- Server and Workstation Support (Linux, Windows, and Hardware).

VEIRA ELECTRONICS PRIVATE LIMITED

13th January 2014 – 29th February 2016, Noida

Role: Quality Engineer cum Desktop Support Engineer

- Quality Assurance Engineer in LED TV production line and Ubuntu Linux OS endpoint and user Support and for LED TV production.

Education

Bachelor of Technology in Electronics & Communication Engineering Uttar Pradesh Technical University, 2010 – 2014

Certification

- RED Hat Certified System Administrator (RHCSA) - Completed
- VMware Certified Technical Associate - Data Center Virtualization - Completed
- AWS Certified Sys Ops Administrator – Associate - Completed
- Microsoft Certified Solutions Associates – Completed
- Azure Administrator Associate (AZ-104) – Completed
- Azure Solutions Architect Expert (AZ-305) – Target

Professional Skills

Individual Contributor	Time Management	Effective Communication
Strong Problem Solver	Leadership and training	Planning and Forecasting
Attention to Details	Resource Management	Team Player
